1. Purpose

Red Balloon of the Air is committed to utilising technology to inform and support learning. We seek to embrace new developments that offer improved learning opportunities to students. Equally we are determined to ensure that all Red Balloon students and staff remain safe and free from the dangers implicit in the use of that technology.

Our aims are to ensure that:

- students do not access material that may be damaging or disturbing to them;
- students do not access material that might be considered to be politically inflammatory or

- lead them towards 'extremist' /'terrorist' behaviour;
- students are not subject to cyber-bullying of any sort;
- students do not engage in the posting of any material that might be deemed offensive or threatening (to anyone, but particularly to other members of the Red Balloon community);
- staff are professional in their online interactions, including use of social media and networking sites.

In line with RBAir aims, our intentions are that students:

- take responsibility for their online presence and acknowledge / understand that 'virtual' behaviour is akin to real world behaviour with the same rights and responsibilities attached;
- understand the safety principles of online content, conduct and contact;
- are well prepared for life beyond Red Balloon;
- make informed decisions for themselves.

RBAir seeks to enable students to navigate the online world safely, endorsing the following quote from E-Safety a Practical Guide for Schools (RM Education 2018) as a vision and guide for what we seek to achieve through this policy:

“Enabling pupils to take full advantage of technology and preparing them for the real world whilst providing a safe environment is a tricky balancing act. Locked-down systems that exert total control over what students can access online provide no opportunity for them to learn how to become digitally responsible. Monitoring and filtering is essential to prevent access to inappropriate content but, for example, banning Facebook or social networking sites could actually leave students more vulnerable when they are outside the school gates if they don't get to learn how to use social media safely”.

2. Scope

This E-Safety policy forms the basis for practice across RBAir. All students have “acceptable use of technology” agreements , signed by students and parents.

Given the nature of RBAir provision (ie that a significant part of student/teacher and student/counsellor contact takes place online), all staff are trained in e-safety and ongoingly supported to ensure that their practice minimises all risks to students and nurtures their wellbeing.

3. Policy statement and provisions

Red Balloon of the Air is committed to utilising technology to inform and support learning. We seek to embrace new developments that offer improved learning opportunities to students. Equally we are determined to ensure that all Red Balloon of the Air students and staff remain safe and free from the dangers implicit in the use of that technology.

Key factors within e-safety

- Online behaviour – understanding what constitutes cyber-bullying and sexting, how to behave safely and with respect for others;
- protecting online reputation – understanding both the risks and rewards of sharing personal information online (digital footprint);
- how to use social networking safely;
- understanding the reliability and validity of online information;
- data security – keeping personal information safe and being aware of viruses and hacking;
- knowing what to do if anything ‘bad’ happens.

In summary all staff will work to ensure that risk is minimised within the key ‘danger’ areas:

- **content** – what students may see or be exposed to (eg spam, misleading adverts, inappropriate sites, exposure to radicalisation);
- **contact** - who students have contact with;
- that students understand how to **conduct** (behave and present) themselves safely online, and
- **contract/commerce** risks through ‘sign-ups’ or sharing personal information.

By ‘inappropriate content’ we refer to material that is not suitable for a young person due to, for example, adult, violent, inaccurate, misleading or extremist content.

RBAir management is acutely aware of its responsibilities under the new ‘Protect’ guidance (see Safeguarding Policy) and will ensure all staff are trained to reduce the risk of any Red Balloon student accessing material likely to lead to radicalisation, but also that students are encouraged to discuss openly any concerns or worries they have regarding radicalisation.

Specific responsibilities

The headteacher (day-to-day practice may be managed by a nominated member of staff) will:

- ensure RBAir has an agreement (generated between students and staff) concerning the appropriate use of technology;
- ensure RBAir follows the recommendations and good practice within the Cyber Essentials certification;
- provide (either directly or through access to appropriate providers) high quality training for staff;
- provide clear guidelines for students regarding the consequences of online bullying and inappropriate use of technology;
- ensure all Red Balloon providers offer clear, open lines of communication through which students are able to report any incidents of concern;
- ensure procedures are in place for responding to e-safety incidents, whether via Smoothwall

alerts and verbal or written reports, and reducing the likelihood of their recurrence;

- ensure RBAir staff provide training and support to students to help them become 'digitally responsible' and to stay safe online (initially through their e-safety module upon starting with our provision, and through ongoing discussion and training opportunities in PSHEE, online community sessions and mentor sessions);
- ensure Red Balloon IT staff monitor and filter online access through the use of Smoothwall safeguarding software to help keep students 'on task', to reduce the likelihood of harmful experiences online, and to flag up any online activities that might indicate potential harm to the student or others;
- ensure Red Balloon staff, particularly IT, safeguarding leads and Link Mentors, engage with parents to help them put e-safety procedures in place at home.

All staff are responsible for ensuring that:

- they have an up-to-date awareness of e-safety matters and of the current RBAir e-safety policy and practices;
- they have contributed to and comply with the local agreement re 'safe use of technology';
- they report any suspected misuse of technology or problem to their Headteacher (or to a member of RBET should that misuse be by the Head of that centre);
- all digital communications with students or their parents are only carried out using official school systems;
- e-safety issues are embedded in all aspects of the curriculum;
- students understand and uphold copyright regulations;
- students are helped, by direct guidance and software, to access appropriate sites only;
- if inappropriate material is accessed, processes to ensure that the likelihood of repeated access is minimised are followed.

As a working professional unit, teachers and support staff must ensure that e-safety is embedded in general practice and taught as a cross-curricular theme.

The designated person for child protection (safeguarding lead) is trained in e-safety issues and the use of safeguarding software, and should be aware of the potential for serious child protection / safeguarding issues that may arise from:

- sharing of personal data;
- access to illegal or inappropriate materials;
- inappropriate online contact with adults or strangers;
- potential or actual incidents of grooming;
- cyber-bullying.

·NB It is important to emphasise that these are child protection issues, not technical issues. The technology simply provides additional means for child protection issues to develop.

Students:

- are responsible for using technology systems at RBAir according to the 'acceptable use' guidelines;
- should uphold copyright regulations;
- need to understand the importance of reporting abuse, misuse or access to inappropriate materials and know how to do so;
- will be expected to be involved in the development of policies on the use of mobile devices, digital cameras, and other technology;
- should be aware of the Red Balloon policy re bullying/cyber-bullying;
- should understand the importance of adopting good e-safety practice when using digital technologies out of school.

Parents *(NB 'parents' is understood to include carers):*

Parents play a crucial role in ensuring that their children understand the need to use the internet / mobile devices in an appropriate way. Red Balloon staff will take every opportunity to help parents understand these issues through parents' evenings, newsletters, letters, and resources on the Red Balloon website. Parents will be encouraged to support Red Balloon staff in promoting good e-safety practice and to follow guidelines on the appropriate use of:

- digital and video images taken at school events;
- access to parents' sections of the website and other online sites;
- their children's personal devices whilst attending a Centre or engaging with online learning.

Use of digital / video images

Staff should inform and educate students about the risks associated with the taking, use, sharing, publication and distribution of images. In particular students should come to recognise the risks attached to publishing their own images on the internet (such as social networking sites).

In accordance with guidance from the Information Commissioner's Office, parents are welcome to take videos and digital images of their children at school events for their own personal use (as such use is not covered by the Data Protection Act). These images should not, however, be published or made publicly available on social networking sites.

Staff and volunteers may take photographs of students when engaged in school activities, but due care should be taken regarding the following:

- students should be appropriately dressed;
- Prior written permission must be obtained from parents / carers before photographs are used on the Red Balloon website or in other information / publicity materials eg newsletters, fliers;
- students' full names should not be posted on a website or blog or within publicity materials when associated with photographs.

* Students are not routinely permitted to take photographs of their peers during Red Balloon activities. If there is a specific reason why a student may wish to take such a photograph(s), then it should be

under the direct supervision of a member of staff or volunteer who takes full responsibility for ensuring the criteria (above) has been met and that any images have been deleted from personal equipment.

NB Staff must never circulate outside the organisation, by email or text, or post on social media sites, photographs of students taken at a Centre or elsewhere (for instance, in the home or on trips or visits).

‘Sexting’:

In the UK, it is against the law to share or distribute explicit images of anyone under the age of 18 - even if the person sharing them is the person in the photo. If caught, students can face police cautions or even arrest. Action taken will be based on the nature of the imagery. Any such action can lead to a criminal record and later failings of DBS checks. Staff will work to ensure that all students know the risks of sending x-rated photos from a personal, emotional and criminal perspective. However an agreement currently exists between the National Police Chiefs Council (formerly ACPO) and the Crown Prosecution Service that advises police forces NOT to prosecute young people sexting unless there are very good reasons to do so.

If it comes to a member of staff’s attention that students are exchanging explicit images across social media - whether invited or not - it is crucial that the situation is dealt with sensitively. Regardless of whether the sharing happens at home or on Red Balloon premises, if it involves Red Balloon students, it should be treated as a school matter, and the involved parties should be approached for advice. We are ‘allowed’ to deal with such matters internally, but will seek advice from the LSCB (local safeguarding children board) when deemed necessary. Referrals to the police will only be made if advice from the LSCB is that this is the appropriate course of action.

Staff postings

RBAir staff must ensure that:

- no reference is made by them on personal social media to students, parents / carers or individual Red Balloon staff;
- they do not engage in online discussion on personal matters relating to members of the school community;
- personal opinions expressed online are not attributed to Red Balloon;
- security settings on their own personal social media profiles are such that students cannot access personal information that is posted there.

The use of live video for learning and teaching purposes

There is a separate policy document with a process for approval of these sessions and jspecific guidance regarding good practice. See Section 4.
